Oceans of Fun!**

Who can Apply?

**All juniors (class of 2025) attending
any Kansas high school are eligible.**

**Preference may be given to rural and military
connected students.**

There is NO COST to attend this camp

Rising seniors who are considering pursuing Engineering in College are invited to apply for an exciting and fully funded camp experience in Lawrence, KS this summer. Gain practical and valuable preparation for college studies in physics, aerospace engineering, artificial intelligence and computer science through classroom inquiry and research demonstrations. Students who participate in this two week camp will have the opportunity to shadow undergraduate and graduate research assistants during the school year. Students will also have priority when applying for ARISE scholarships which provide up to \$7,800 annually. See this website for more details: crisis.ku.edu
